How to unfold a vegetable box

Follow these directions to break down your vegetable box. We need to reuse these expensive boxes, so please take care not to tear them.

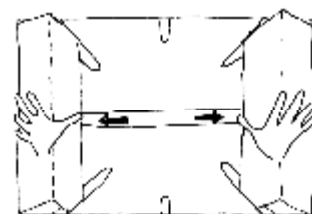

We use several different boxes. Depending on which box you receive, your box may look like the one shown on the right side of the page or the one shown on the left side of the page. Regardless, you should follow the same three basic steps for unfolding them.

1. Place your box with the bottom up. Note that the flaps on the right and left sides of the box have a crease, shown in the pictures by dotted lines.

2. Fold the right and left flaps upwards along their creases and slide them out of the holes into which they are inserted.

3. Once you have the flaps on the right and left sides of the box bottom lifted up, as shown in the bottom picture, you can lift the other two flaps upward as well and then flatten the entire box
